

What it does: SteelyNewsPanel docks a news panel on your chart: the latest FinancialJuice headlines and Donald Trump's Truth Social posts, plus, with Trump Live on and your own free YouTube key, a banner for White House live streams. It shows items as published; nothing is drawn on price.

MNQ, 10-minute: the panel docked top left, with Trump Posts (Truth Social) above FinancialJuice headlines and the status line between them. Shown for illustration only.

NEW TO NEWS FEEDS

Read the panel at a glance

Top to bottom: the live banner (when on), Trump posts, a status line, then FinancialJuice headlines, each list newest first. Every item shows its age. Colors come from a plain text match, not from reading the news.

[4m]	Age: time since the source published it, as of the last check. Yellow under 3 min, grey under 15 min, then dim.
△ orange	A headline with a hot word: breaking, flash, alert, halt, Fed, FOMC, CPI, NFP, GDP, rate, missile, war or nuclear.
Green / red	Otherwise, a bullish word (rally, surge, jump...) makes it green and a bearish one (crash, plunge, drop...) red.
★ NEW	The last check brought a new top headline. It shows in bold, and can ping and flash the panel.
TS / X	Post source: Truth Social or X. RTH+1:55 = 1 h 55 min after the 9:30 ET open. ∪ = repost; △ orange = market keyword.
TRUMP LIVE	Red banner, pulsing dot: a stream with Trump, POTUS or President in its title is live. WH LIVE (amber): another live stream. Next: the next scheduled stream, with a countdown.

Reading the status lines

Last poll	PC clock time of the last headline check, and how many headlines are listed (up to 15).
Orange / red	Orange: throttled, empty feed, or a failed check with headlines still listed. Red: failed, nothing to show yet.
TS ok / retry	TRUMP POSTS status for each source: ok, ... (first check), retry (code), or an X token or credit message.
Live detect off	Trump Live is on but has no YouTube API Key or channel ID. Headlines and posts still work.

Hover any part for a full explanation. Double-click a post or the live banner to open it. Drag the panel anywhere; the spot is saved.

FOR EXPERIENCED TRADERS

The rules, exactly

Headlines	FinancialJuice's free RSS feed, checked every 60 s by each panel; the latest 15 are listed. The first load never pings. A new top item pings (Alert3.wav) and flashes the panel amber.
Posts	Truth Social via the trumpstruth.org archive (a few minutes behind), checked every 60 s; X only with your own token. Merged newest first, 8 shown, reposts hidden. Alerts only for market words (tariff, Fed, China, oil...).
Live banner	Off by default; needs your free YouTube Data API v3 key. Checks the White House channel's 15 newest uploads every 15 s, 7:30 AM–4:30 PM ET on weekdays, else every 5 min. Streams live over 6 h are ignored.
Shared checks	Live and post checks run once per NinjaTrader and feed every chart, so their sounds play once. The most recently loaded panel's settings drive them.
Back-off	If FinancialJuice throttles (HTTP 429), checks slow down, up to 5 min apart, and cached headlines stay. The banner keeps its last good state until 3 checks in a row fail.

Get started in three steps

1. Claim your free license and download from the indicator page below.
2. In NinjaTrader 8: Tools › Import › NinjaScript Add-On, then select the file.
3. Right-click a chart › Indicators › add **SteelyNewsPanel**, and paste your license key when asked. Defaults are ready to use.

Useful settings

Time Tag Anchor (New York RTH Open) · **Font Size** (10) · **Enable Audio Ping** · **Enable HUD Flash** · **Enable Trump Live** (off) · **YouTube API Key** (saved in workspaces and templates) · **Post Source** · **Alert Only On Market Posts** (on).
